## **CLAIMS**

S	An electronic publishing system for generating personalized web pages according to a
2	user's optimum mode of learning, comprising:
3	(a) a computer system coupled to a plurality of users through a distributed
4	\information network (DIN);
5	(b) means for generating and storing a plurality of profiles selectable by users
6	according to their optimum mode of learning;
7	(c) means for creating document templates displaying the structure of
8	information to be presented on a web site serving the users;
9	(d) means for creating style sheets determining the presentation of the layout
1 <u>0</u> 1 <u>0</u>	of a document template for the plurality of profiles defining the various learning modes;
1 <b>.</b> 1 <b>.</b> 1.	and
PIGE EX 1752 STIC	(e) calculating a user profile as a vector of weights.
1	2. The system of Claim 1 wherein the document templates are created with the industry
2	standard Document Type Definition (DTD) syntax.
	3. The system of Claim 1 wherein the style sheets are created using the Extensible Style
2	Sheet Language (XSL)
1	4. The system of Claim 1 wherein the content is created using an Extensible Mark-Up
2	Language (XML).
1	5. The system of Claim 1 wherein HTML files are created for content and correspond to the
2	different modes of learning.
1	6. The system of Claim I further comprising means for calculating a user's profile based
2	upon responses to a questionnaire and a cognitive learning theory.

1 7. The system of Claim 1 further comprising means for calculating a user profile as a vector 2 of weights. 1 In an electronic publishing system including a computer system coupled to a plurality of 8. 2 users in a distributed information network, a method of generating personalized web pages 3 according to a user's optimum mode of learning, comprising the steps of: 4 creating a user profile indicative of an optimum mode of learning; (a) creating document templates using an industry standard syntax; 5 (b) 6 creating content in a standard industry language; (c) 7 creating style sheets in a standard format mapped to the content to the different (d) modes of learning; combining the content file with the style sheets to generate a web file; and (e) providing a web page to a user that matches the user's optimum mode of learning (f) based upon an identifier of the user's profile. The method of Claim 8 further comprising the step of: 9. calculating a user's profile based upon responses to a questionnaire and a (g) cognitive learning theory. The method of Claim 8 further comprising the step of: 10. 2 calculating a user profile as a vector of weights. (h) 1 11. The method of Claim 8 further comprising the step of: 2 (i) providing a user information defined by the style sheets and user profile in an HTML file based upon a HTTP cookie or URL string with an encoded profile identifier 3

or user name.

4

1	12.	All article of manufacture.
2		a program medium for generating personalized web pages according to a user's optimum
3	mode o	of learning, comprising:
4		(a) program instruction means in the medium for generating and storing a
5		plurality of profiles selectable by users according to their optimum mode of learning;
6		(b) program instruction means in the medium means for creating document
7		templates displaying the structure of information to be presented on a web site serving the
8		users; and
9		(c) program instruction means in the medium for creating style sheets
9		determining the presentation of the layout of a document template for the plurality of
		profiles defining the various learning modes; and
2		(d) program instruction means in the medium for providing a user information
		defined by the style sheets and user profile in an HTML file based upon a HTTP cookie
4		or URL string with an encoded profile identifier or user name.
1	13.	The article of manufacture of Claim 9 further comprising:
2		(e) program instruction means in the medium for calculating a user's profile
3		based upon responses to a questionnaire and a cognitive learning theory.
1	14.	The article of manufacture of Claim 9 further comprising:
2		(f) program instruction means in the medium for calculating a user profile as
3		a vector of weights.
